

Jon ROBERTS BSc (Hons), PhD, FGS

Geologist

Dr. Roberts is a senior geologist who has been responsible for setting up and running Concept's soil-testing laboratory to British Standard Institute (BSI) standards. He is also responsible for the design, implementation and management of company policy and quality systems/procedures in order to achieve ISO 9001:2000 Quality Management accreditation (LRQA approved).

He has several years experience in project managing site investigations and has been actively involved in the training of staff and site technicians in geo-environmental site investigation techniques and laboratory testing methodologies. He is also responsible for environmental consultancy including interpretation of historical, environmental, geological information and field-data and produces desk study and geochemical risk assessment reports. He is also experienced in the reporting requirements of the Association of Geotechnical Specialists electronic data transfer format (AGS).
