

**Eur Ing Anastasia SAVIDU DIP CivEng, MSc, DIC**  
Geotechnical Specialist / Professional Civil Engineer

Mrs Savidu is a director and founding member of Concept. She is a Geotechnical Specialist/Civil Engineer with over 20 years experience in the Civil Engineering Industry.

For the past 10 years she has been developing Concept Site Investigations and has organised and carried out complex site investigations. She places a strong emphasis on health and safety and has developed Concept's health and safety, environmental and employment policies.

She has worked internationally as a consultant structural engineer, managing the design and construction of a number of residential dwellings and blocks of flats. For over 7 years, she worked with Ove Arup and Partners where she was involved amongst others in the risk assessment of the recovery scheme for the Heathrow Express tunnels collapse. She has also worked in the Insurance industry carrying out building surveys and subsidence investigations and the complete project management of the required repairs.

She has in depth experience of carrying out defect and structural surveys for domestic/residential buildings and the design, specification and implementation of refurbishment schemes. She also has extensive experience in the preparation of desk studies and geotechnical interpretative reports and the design and supervision of deep and shallow foundations, earth retaining structures and temporary works. She has been involved with tunnelling projects, in particular with the assessment and back analysis of ground movements and development of tunnel induced settlement prediction computer programs. She has been involved in litigation work providing expert advice on geotechnical matters.
